

NHD-500 Series

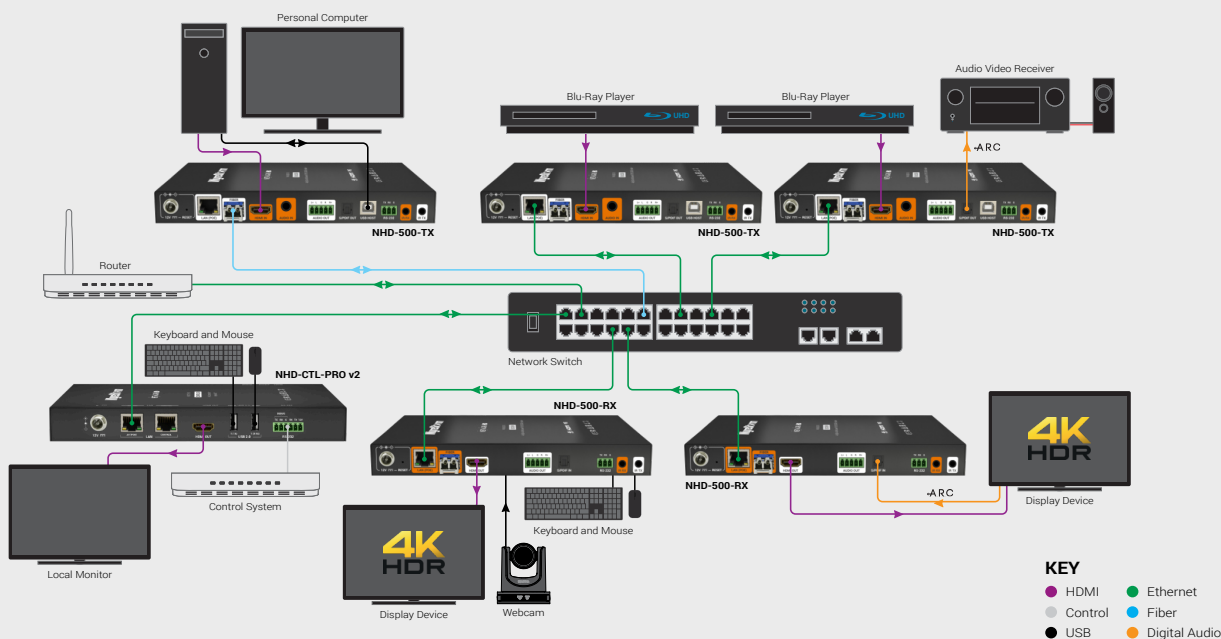

Ultra-Low Latency. 4K60 AV over IP Distribution. Limitless Scale.

The NHD-500 Series is WyreStorm's 1G AV over IP flagship platform, delivering visually lossless 4K60 4:4:4 video with ultra-low latency, built-in fiber, Dante AV-A audio, and SYGMA cloud management over standard 1Gbps infrastructure.

Why Choose NetworkHD 500 Series?

The NHD-500 Series delivers high-quality JPEG 2000 video over a standard 1G network, combining ultra-low latency transmission, built-in fiber connectivity, Dante AV-A audio, and SYGMA cloud management in one unified, fast, and scalable ecosystem.

Visually lossless. Infinitely flexible. Always connected.

Key Benefits

4K60 4:4:4 JPEG 2000 Quality

Cinema-grade JPEG 2000 delivers visually lossless 4K60 4:4:4 with Dolby Vision, HDR10 and HLG over standard 1Gbps infrastructure.

Ultra-Low Latency Switching

Sub-frame latency of less than 16ms in passthrough mode ensures seamless, lag-free source switching across any installation.

Native Fiber Connectivity

Built-in SFP port extends reach to 550m over OM3 MMF or up to 10km over SMF with no extra hardware required.

Dante AV-A Integration (V2)

A dedicated Dante AV-A port on V2 encoders and decoders enables seamless professional audio routing on the same 1G network.

Video Walls Up to 16x16

Create up to 256-display video walls with bezel correction, mosaic layouts, and screen rotation via the NetworkHD Touch app.

SYGMA Cloud Management

Monitor, configure, and manage any NHD-500 deployment remotely from anywhere via WyreStorm's SYGMA cloud platform.

Main Applications

Education

- Lecture halls, campus AV distribution, and digital signage networks.

Corporate

- Large-Scale Boardrooms, command centres, and multi-site AV distribution environments

Government & Security

- Control rooms, secure video distribution, courtrooms, C&C centers, and mission-critical display systems

Entertainment & Venues

- Live events, digital signage walls, hospitality outlets, and immersive multi-display installations
