

MX-0812-SCL

Matrix Switching. Video Walls.

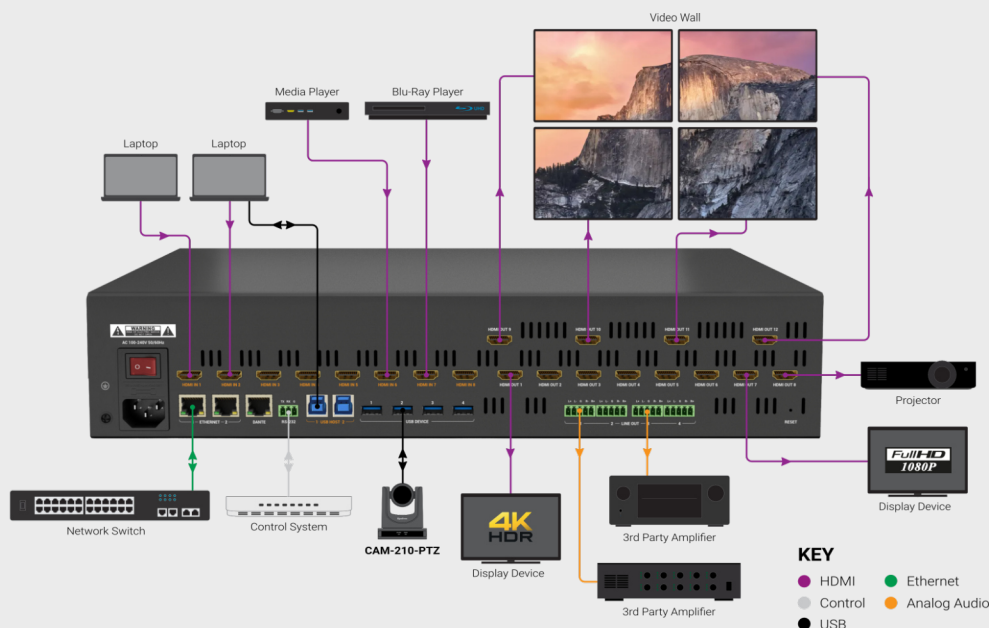

Multiview. All in One.

The MX-0812-SCL is one of WyreStorm's most advanced HDMI matrix switchers, combining 8x12 4K60 seamless switching, per-output scaling, video wall processing, Dante 4x4 audio integration, and a built-in USB 3.0 hub in a compact 2RU chassis.

Why Choose MX-0812-SCL?

The MX-0812-SCL consolidates seamless matrix switching, video wall control, and multi-view processing into three powerful operating modes, eliminating the need for multiple systems.

Seamless. Powerful. Intelligent.

Key Benefits

8x12 Seamless Switcher

Fast source switching across all 12 outputs with no black screen or signal interruption, supporting 4K60 with HDR10, Dolby Vision, and HLG across every input and output.

4K60 Scaling on Every Output

Each of the 12 HDMI outputs features a dedicated 4K60 scaler, automatically adapting resolutions from 480p to 2160p for mixed-display environments.

Video Wall Processing

Outputs 9–12 deliver full video wall control with cropping, bezel correction, scaling, grouping, and 90/180/270° image rotation for creative display arrangements.

Multiview Outputs 1-4

Display up to four sources simultaneously on a single screen using PiP, PbP, Split Screen, Master, or Quad view layouts mirrored across outputs 1–4.

Dante 4x4

Full Dante 4x4 network with HDMI de-embedding from all 8 inputs, 4 analog outputs, and independent audio switching across 12 audio inputs to 8 audio outputs.

Built-in USB 3.0 Hub

Onboard USB 3.0 hub with 4 device ports and 2 host ports enables shared peripheral access, perfect for conference cameras, microphones, and control interfaces.

Main Applications

Education

- University campuses, training rooms, and multi-source large lecture theatres

Corporate

- Executive boardrooms, multi-screen conference rooms, and high-impact presentation environments

Command & Control

- Security operations centres, control rooms, and emergency management facilities

Entertainment & Venues

- Podcast and live studios, digital signage walls, and immersive multi-display AV installations
