Product Overview

2-Input 4K Wireless Presentation and Conferencing System

The 'SW-620-TX-W' is the lite version of 'SW-640L-TX-W' with some enhancement. It is a wireless presentation switcher, when paired with the APO-DG2 or APO-DG2-PRO USB-C casting dongle, forms a powerful 4K wireless presentation and conferencing system. This setup ensures a seamless and superior hybrid meeting experience.

Building on the strengths of its predecessors, the SW-620-TX-W features one full-function USB-C input, one HDMI input, and two HDMI outputs, offering flexible connectivity options for various setups. It is ideal for small to medium-sized meeting rooms and classrooms, effectively meeting diverse application requirements and enhancing collaboration efficiency.

Main Features

Reliable and High-Quality Resolution

4K resolution guarantees sharp and clear video, delivering a fully immersive presentation experience.

Comprehensive Input Options

Offers a variety of inputs, including USB-C and HDMI, ensuring compatibility with devices used in conferences, meetings, and educational settings.

Full-Featured USB-C Support

The USB-C port provides power delivery, network, video, and USB transmission through a single cable, simplifying connections and maintaining a clean and tidy workspace.

Multi-Stream Transport(MST) Capability over USB-C

Supports USB-C MST technology, enabling simplified connections, reduced cabling, efficient resource utilization, and flexible multi-screen configurations

Wireless Casting and Conferencing Support

Supports multiple presentation methods for classes or meetings, including Airplay mirroring, Miracast, and Dongle. In addition to wireless casting, it also support wireless conferencing through dongle integration.

Multiview Support & Dual HDMI Outputs

Displays up to dual-view when connecting one screen. Supports dual HDMI outputs with two independent full-screen sources displayed simultaneously for maximum flexibility.

Balanced Audio De-embedding

Independent de-embedding audio works seamlessly with external audio systems. It creates a more immersive audio experience for presenters and participants.

KVM Switch for Display

Includes USB 3.0 (Device and Host) ports for cameras, speakerphones, and keyboards. Perfect for hybrid meetings and education.

Versatile and Flexible Ethernet

Advanced Ethernet capabilities provide a reliable network environment, enhancing interactive experiences, especially during hybrid meetings and education. Ethernet Bridge and Ethernet Isolation ensure a stable and secure usage experience.

WyreStorm®

Powerful · Reliable · Simple

Why Choose Us: 1. Easy Click Wireless Conferencing

Transform your meeting room with easy click wireless conferencing, ensuring easy connectivity, seamless integration, and enhanced productivity.

Effortless Connectivity

With just click on the APO-DG2/APO-DG2-PRO USB-C dongle, you can control your USB conferencing devices wirelessly, eliminating the hassle of tangled cables.

Seamless Integration

Seamlessly integrates with cameras, speakerphones, video bars, touch-screen panels, and other USB 3.0 peripherals, ensuring a superior hybrid meeting experience.

Boost Productivity

Quickly transition between meetings with minimal setup time, ensuring a smooth and productive workflow.

High-Quality Performance

Delivers clear and reliable audio-visual communication, critical for effective collaboration.

Powerful · Reliable · Simple

Why Choose Us: 2. Easy Sharing and Collaboration for Everyone

Simplify screen sharing and collaboration across multiple devices and operating systems, enabling seamless interaction and greater engagement.

Multiple Casting Methods

Supports AirPlay Mirroring, Miracast, USB-C dongles, and HDMI/USB-C wired connections, offering flexible options for different users and devices.

Universal Compatibility

Seamlessly works with laptops, tablets, and smartphones, supporting major operating systems including Windows, macOS, and Android.

Interactive Learning

Ideal for classrooms, allowing teachers to easily share content and students to engage interactively using their own devices.

Engage Your Audience

Multiview mode allows up to two sources to be displayed simultaneously, making collaboration and data comparison more intuitive and efficient.

Why Choose Us: 3. Plug & Play, Guest-Friendly

Simplify setup with plug-and-play functionality, making it easy for guests to connect and present without any hassle.

Simplified Setup

Plug-and-play functionality allows guests to connect instantly with no need for additional software or complex configurations.

Versatile Input Options

Equipped with one full-featured USB-C port (100W PD for guests' laptops) and one HDMI input, it offers maximum flexibility for diverse presentation needs.

Present in Seconds

Guests can simply pick up the dongle and start sharing instantly, ensuring a smooth and efficient presentation experience.

Secure Network Access

Switch to "Isolated Mode" when you need to separate your internal network from the guests' network. This mode ensures secure and reliable guest access, even during system configuration.

Interface of the Product

Front Panel

Rear Panel

Featuring:

Advanced USB-C Integration

It provides not only video, audio, and USB signals, but also 100W power delivery, stable network access, and MST capability.

Multiple Wired Network Connectivity

Offers multiple wired connections including USB-C, USB Host, and Ethernet (in non-isolated mode), ensuring stable and reliable network performance for AV applications.

Specifications & Packing List

Main Specifications

Input Video Port	Wired: 1x USB-C, 1x HDMI Wireless: Miracast, Airplay, Dongle(APO-DG2/APO-DG2-PRO)
Max. Input Resolutions	USB-C/HDMI: 4K@30Hz Miracast: 1080P@60Hz Airplay Mirroring: 1080P@60Hz Dongle: 4K@30Hz
Output Video Port	2x HDMI
Max. Output Resolutions	HDMI OUT 1: 4K@60Hz HDMI OUT 2: 4K@30Hz
Input Audio Port	1x HDMI, 1x USB-C, 2x LAN, 2x Wi-Fi
Output Audio Port	2 x HDMI, 1 x Analog Audio Out
USB Device	3x USB3.0 Type-A
Control Method	Web UI, Telnet API, RS-232
Power Supply	20V 10A DC

What's in the Box?

- 1x SW-620-TX-W
- 1x 20V/10A Power Supply
- 4x AC cables, US, EU, UK, AU specification
- 4x Plastic Mounting Brackets
- 1x 2-pin Phoenix Connector (for MUTE port)
- 1x 4-pin Phoenix Connector (for RS-232)
- 1x 5-pin Phoenix Connector (for Audio Out)
- 4x Wi-Fi Antennas
- 1x Quick Start Guide

Typical Connection & Applications

The SW-620-TX-W system seamlessly integrates with all your conferencing equipment, such as room PCs, laptops, displays, webcams, speakerphones, and amplifiers. It's designed to meet all your needs for high-quality video presentations and remote conferencing. See the typical connection diagram below for reference.

Typical Connection & Applications

Application Scenario 1: Small Classroom

This solution empowers teachers to easily share teaching content and engage students who can participate using their own devices. It enhances classroom interactivity and improves teaching efficiency.

Key Benefits Include:

- **Full-Featured USB-C Supported:** Provide video, audio, USB3.0, Ethernet, and 100W charging with one cable.
- **MST Capacity over USB-C:** Enable multi-display extension through a single cable, delivering a cleaner setup and more efficient content sharing.
- **Multiple Casting Methods:** Simplifies presentations with various casting options.
- **Dual-Screen Connection:** Ensures clear and comprehensive display.
- **Fast Seamless Switching:** Quick and smooth transitions between inputs.

Typical Connection & Applications

Application Scenario 2: Medium Conference Room

This solution simplifies installation with its plug-and-play design, significantly enhancing meeting efficiency for both in-person and remote conferencing, ensuring every meeting is productive and smooth.

Key Benefits Include:

- **Advanced USB-C Supported:** Provide video, audio, USB3.0, Ethernet, and 100W charging with one cable.
- **Multiple Casting Methods:** Simplifies presentations with various casting options.
- **Multiview Function:** Synchronous display of multiple information sources.
- **Fast Seamless Switching:** Quick and smooth transitions between inputs.

Our Advantages

This versatile system is designed for conference rooms and classrooms, meeting diverse signal transmission requirements. It delivers efficient, high-quality performance for seamless presentations and hybrid collaboration.

Our key advantages include:

- **Full-Featured USB-C Port:** Transmits video, audio, USB data, Ethernet (1G), and up to 100W power delivery through a single cable.
- **Multiview Support:** Displays up to two views simultaneously on one screen connection for flexible content sharing.
- **Dual Ethernet Ports:** Provide secure, stable network access for guest PCs and enable simple system configuration through a web interface.
- **Dual HDMI Outputs:** Offer flexible display configurations for different room setups.
- **Cost-Effective Solution:** Combines multiple functions in one system, delivering excellent value at a competitive price.

Introduction of Web Configuration Interface

The Web UI of the SW-620-TX-W presentation system is designed for intuitive device management and configuration through any web browser.

The settings and configurations you can perform are as follows:

Web UI Functionality:

- **Interface:** Manage device settings via web browsers.
- **Customization:** Personalize splash screen and network security.
- **Control:** Configure video inputs, outputs, and wireless settings.

Key Web UI Configurations:

- **General Settings:** IP configuration, security, and firmware updates, like modifying the device name, or the device's Wi-Fi hotspot name, setting the access code, etc.
- **Video Inputs/Outputs:** Manage HDMI sources and EDID profiles.
- **Screen Sharing:** Enable wireless display or multiview features.
- **Display Control:** Use CEC and RS-232 for display management, customize the guide screen picture, etc.
