

CAM-0402-NDI-BRG

Your 4K Multi-Camera Bridge for Smarter Meetings & Live Events

Bring every angle to the table. The CAM-0402-NDI-BRG makes switching between multiple cameras and sources simple and professional. With HDMI, USB, and NDI inputs and outputs, it delivers seamless 4K video for conferencing, streaming, and hybrid events, all in one compact device.

Control is flexible: use onboard buttons, a web UI, or even switch directly inside Microsoft Teams with our native app integration. From corporate boardrooms to classrooms, live productions to government meetings, the CAM-0402-NDI-BRG ensures your audience always sees the bigger picture.

Discover how the CAM-0402-BRG can transform your next meeting or live stream.

Key Benefits

Bring Every Angle Together

Easily switch between multiple cameras, presentations, and NDI streams to keep your audience engaged.

One Device, Total Flexibility

Mix HDMI, USB, and NDI inputs, then output via USB, HDMI, or NDI, all at once, in stunning 4K

Seamless Multiview

Show up to 4 sources on screen at the same time, perfect for hybrid classrooms, town halls, or live events.

Instant Compatibility

Works as a plug-and-play webcam with Teams, Zoom, OBS, vMix, and more, no extra drivers or complexity.

Native Microsoft Teams Control

Switch sources directly inside Teams meetings, no extra hardware or software needed.

Made Simple for Any User

Compact, intuitive, and easy to control, whether you're running a corporate meeting, a lecture, or a live stream.

Main Applications

Education

- Hybrid classrooms, Multi-angle Training Sessions

Government

- Courtrooms, council chambers, and public live streaming.

Corporate

- Boardrooms, Town halls or internal broadcasts

Live Events

- Webinars, Houses of worship and small productions
